Endorsement of JTRS SCA 2.2.2

1 Endorsement Statement

The SDR Forum endorses the JTRS SCA 2.2.2 [1], without the extension, as a software architecture for software defined radios. This endorsement is non-exclusive and the SDR Forum may endorse additional architectures for application areas where the SCA 2.2.2 is not an ideal match.

The SDR Forum recognizes that additional resources are needed by SCA 2.2.2 adopters and intends to provide support material, such as an Interpretation Guide, a User's Guide, Implementers Guides for some related APIs, additional APIs, and test and evaluation plan to assist users of the SCA.
