

CALL FOR PARTICIPATION

PROJECT NAME: _____

Business Modes for SDR Open Source Air Interfaces

PROJECT GOALS:

Develop a report that will provide a description of open source licenses, potential business models, languages and development environments (C, python, Matlab), potential customers and markets for open source air interfaces, potential developers, and currently available open source projects.

IDEAL PROJECT FOR: _____

Baseband providers • Computer Manufacturers (MIDS) • Automotive Electronics Suppliers • Handset Manufacturers • Infrastructure Manufacturers • Software Services Companies • Operators

This provides an exciting opportunity to provide companies with information on the creation and availability of open source air interface business models, identify new innovations resulting from open source air interface availability and speculate on types of companies that can be started and others that would benefit from open air interface availability.

TO GET INVOLVED:

Contact John Glossner at jglossner@sandbridgetech.com
or Forum CEO Lee Pucker at Lee.Pucker@WirelessInnovation.org
