

# CALL FOR PARTICIPATION

## PROJECT NAME: \_\_\_\_\_

Test Guidelines and Requirements for Television Band Devices (TVBDs)  
Designed to Operate on Available Broadcast TV Channels

## PROJECT GOALS:

Develop a set of test guidelines and methodologies, based on various use cases and test requirements for SDR/Cognitive Radio unique functions required for unlicensed access to TV band spectrum, also known as TV White Space (TVWS)

## DESIRED OUTCOME: \_\_\_\_\_

A set of guidelines that provides the basis for test and certification of Secondary Access Systems.

The guidelines will address critical TVBD functions such as spectrum sensing, interference avoidance, database performance, and adherence to policy. The test methodologies will consider a range of SDR/CR platforms, protocols, algorithms, use cases, and spectrum stakeholder requirements.
