

For Immediate Release

SDR Forum Announces SDR'09 Call for Papers

Washington, 8 January , 2009 – The SDR Forum, a non-profit international industry association dedicated to promoting the success of next generation radio technology, has announced today it is accepting abstracts and proposals for its annual technical conference and product exposition, **SDR'09** (www.sdrforum.org/sdr09).

SDR'09 will be held 1-4 December 2009, in Washington, D.C. Last year's event, also held in Washington, D.C, attracted more than 400 attendees from 27 countries, representing all aspects of the reconfigurable radio value chain, from research through deployment. This year, SDR'09 will feature more than 40 exhibitors as well as four full days of presentations, workshops and tutorials/demonstrations.

Abstracts and proposals are being solicited in three areas: papers, tutorials/workshops and demonstrations. Papers are in three general categories: technical, markets, and regulatory/policy. Technical papers should provide a perspective on the current state of the art in reconfigurable radio technology and the practical commercialization of these technologies, future trends or technology innovations. Markets papers should provide a multi-disciplinary analysis of roadmaps, opportunities and constraints inherent in manufacturing and deploying software defined and cognitive radio systems to include business models, business strategies, and globalization. Regulatory/Policy papers should also provide a multidisciplinary analysis of regulatory frameworks and their impact on business models, differences in regional regulatory policy and harmonization efforts. Demonstrations will enable our member companies to demonstrate advanced and innovative technologies relevant to software defined and cognitive radio systems.

For more information on specific paper topics and submission guidelines, go to www.sdrforum.org/SDR09/papers.

Abstract submissions for papers are due 20 March 2009, tutorial and workshop proposals are due 17 April 2009 and demonstration proposals are due 12 June 2009. Those interested in exhibiting should visit www.sdrforum.org/SDR09/exhibitor or contact Allan Margulies at asm@sdrforum.org.
