Endorsement of JTNC SCA 2.2.2

1 Endorsement Statement

The Wireless Innovation Forum endorses the JTNC SCA 2.2.2 [1], without the extension, as a software architecture for software defined radios. This endorsement is non-exclusive and the Wireless Innovation Forum may endorse additional architectures for application areas where the SCA 2.2.2 is not an ideal match.

The Wireless Innovation Forum recognizes that additional resources are needed by SCA 2.2.2 adopters and intends to provide support material, such as an Interpretation Guide, a User's Guide, Implementers Guides for some related APIs, additional APIs, and test and evaluation plan to assist users of the SCA.
