ZigBee Alliance

● Who We Are

- Open, global not-for-profit since 2002
- More than 400 companies worldwide are members
- Membership is approximately 40% Americas, 35% Asia, 25% EMEA

● What We Do

- Develop standards for wireless device-to-device communication (Internet of Things)
- Certify products to help insure interoperability through the ZigBee Certified program
- Promote the use of ZigBee standards around the world

Smart Home

Standardization

Open, Global Standard Benefits

- Single product can be deployed globally
- Consumer choice of products
- Product Competition
 - Quality
 - Product Feature Innovation
- Price Competition
- Buyer choice of suppliers
 - No vendor lock-in to specific chip manufacturer
 - Multiple sources for interoperable end products

ZigBee continues to be the **primary driver** toward **standardization and interoperability** and will see further **strong growth** across many markets, accounting for almost **80% of total 802.15.4-enabled device shipments** in 2018. – *ABI, July 2013*

More Connected Devices

Key IoT Network Attributes

- No new wires
- Easy to install and maintain (mesh, self organizing, self healing)
- Ability to scale easily to thousands of nodes
- Secure (AES 128)
- Reliable (mesh, multiple channels, demonstrated interference tolerance)
- Long battery life (years on an AA battery)
- Low Cost (open standard, many suppliers)

The Standard for Residential Lighting

“The Connected Lighting Alliance announced today its endorsement of ZigBee Light Link as the preferred common open standard for residential connected lighting applications, simplifying choices for both lighting companies and consumers. ...

This decision represents the first time an alliance of leading lighting companies has unanimously endorsed a common open standard for wireless lighting solutions.”

ON World: ZigBee Will Lead the Fixed Wireless Sensor Network Market to 1 Billion Units in 2018

- **“With its dominance for smart lighting assured, ZigBee is poised to drive the fixed Wireless Sensor Network (WSN) market to 1 billion annual unit shipments within the next five years.”**
- **WSN chipsets for lighting controls will reach 100 million annual units within the next decade.**
- **WSN chipsets for home automation and entertainment will increase by nearly 1400 percent between 2011 and 2016.**
- **Source: ON World: “802.15.4 & ZigBee: Expanding Markets, Increasing Threats”**
